**Management of patients within this facility will proceed as follows, in order to reduce generation of infectious TB particles** (describe the flow of patients through the facility, indicating how and where the triage of patients according to cough will be done and where waiting areas will be):

**Floor plan of facility showing client movements and air flow directions:****TB infection control at facility reception area:**

The following TB infection control practices will be implemented at reception into our facility	Name of Person Responsible:
• Posters about TB infection control will be displayed.	
• The queuing system will be explained to all clients.	
• All clients will be asked if they are coughing.	
• Clients who cough will be asked to cough into tissues or a mask.	
• Clients who cough will be given tissues or a mask.	
• Clients who cough will be asked to dispose of tissues or mask using bins provided.	
• Clients who cough will be directed to a special waiting area.	

Area Description:	Name of Person Responsible:
• Posters about TB infection control will be displayed	
• The professional nurse (or nurse staffing the service) will periodically scan the queue for coughing clients.	
• Coughing clients will be seen first.	
• Direction of air flow in each consultation room will be established and marked with a sign. HCW should sit with the clean air moving from behind them towards the client.	
• N95 respirator/masks will be available in consultation rooms for HCW.	
• Tissues and masks will be displayed in a prominent position in the waiting area.	
• Bins or appropriate receptacles for disposal of tissues/masks will be placed in a prominent position in the waiting area.	
• Windows or doors will be opened to ensure maximum air flow.	
• Appropriate arrangement of professional nurse/doctor and patient in consultation room will be maintained according to airflow direction.	

• N95 respirator/masks will be available in consultation rooms for HCWs.	
• Fans will be located in appropriate areas (consultation rooms and/or waiting areas) and be operational.
